

Anubis Callout Guide

Every callout on the map, the second way in that defenders forget, and the habits that hold the site.

1 • THE PLAY

Defending A? Watch Connector too

1. **Attackers can also come up Middle and through Connector.**
2. **Stare at Main,** and they walk out of Connector on your flank.
3. **So split it.** One holds Main, one holds Connector.
4. **Hear footsteps in Middle?** Call it early.

Two ways in. Two players watching.

Four habits that win A site

No lineups to memorise. These work every round.

1 Don't hold the same angle twice. Two players looking at Main leaves Connector open. One each.

2 Call numbers, not just a place. "Three Main" tells your rotators straight away whether to come.

3 Fall back, don't die alone. Outnumbered? Back off and retake with your team instead of a 1v3.

4 Change your spot. Hold from the same place every round and they'll pre-aim it.

Know the calls. Now check your rounds.

Upload a round at callup.gg and get it reviewed.
